🌐 [Sylvia-Kemo](#)

Software engineer who builds clear, useful web products with React, TypeScript and Python. I turn data into dashboards people can act on, and I add AI to existing products to remove manual work. I'm now looking to bring these skills to fintech and data-driven teams, building products that make payments and money easier to manage.

EXPERIENCE

Nexus Wave AI, Remote — Software Developer (Full-Stack)

MAY 2025 – JUNE 2026 · AI CUSTOMER-SUPPORT PLATFORM

- Built and maintained a **customer support platform** used by support teams to manage customer conversations.
- Developed a **real-time analytics dashboard** that shows managers how their support team is performing.
- Integrated **AI (OpenAI with Python)** to understand customer requests and send them to the right agent.
- Built the **live chat interface** where agents read and reply to customers, connected through **REST APIs**.
- Worked with backend engineers to **plan APIs** and catch integration problems early.
- Packaged and deployed services with **Docker** on **Azure**, using **PostgreSQL** and **MongoDB** for data storage.

Stack: React, TypeScript, Python, PostgreSQL, MongoDB, OpenAI

GroupWork Kenya, Remote — Frontend Developer

JAN 2024 – FEB 2025 · ACADEMIC MANAGEMENT SYSTEM

- Built the **frontend** of an **academic management system** used by students, lecturers and administrators.
- Created dashboards for each user role, with **role-based access** to pages and features.
- Added class scheduling with **Google Meet** and **Zoom APIs** so lecturers could set up online classes inside the system.
- Built **data dashboards** that show student progress and course completion.
- Connected the frontend to **REST APIs** and **Firebase** to keep data up to date across the system.

Stack: React, TypeScript, Firebase, Tailwind CSS, Ant Design, REST APIs

PROJECTS

[SGA Security](#) — Home security portal

Built the home-security solutions portal for a security services company, presenting its residential product range.

[Kymba](#) — Multilingual e-commerce site

Co-developed a German watch brand's website, including product, pricing and package pages.

[Timiza](#) — Project management dashboard

Designed and built a dashboard for small agencies to manage client projects, tasks and deadlines in one place, with progress tracking, search and filters.

EDUCATION

BSc Information Technology

Kabarak University, Kenya
GRADUATED 2024

SKILLS

Frontend

React, TypeScript, JavaScript, Next.js, Tailwind CSS, Ant Design, HTML5, CSS3

Backend

Python, FastAPI, Django, Node.js, REST APIs

AI

OpenAI API, intent classification, LLM code evaluation

Data & Charts

Recharts, Chart.js, real-time dashboards

DATABASES

PostgreSQL, MongoDB, MySQL, Firebase Firestore, Prisma

CLOUD & TOOLS

Docker, Azure, Google Cloud, GitHub Actions (CI/CD), Git, Bitbucket, Figma

OPEN SOURCE

Pull requests to open-source JavaScript libraries: bug fixes, documentation and test coverage.

INTERESTS

Fintech and payments, data products, AI-powered tools
